

Dorman Products (formerly R & B)

General Description

Integrating a new pick/pass and ship operation in the existing warehouse, using the same pop-up sorter for pick and pass. Installing new and re-working rack at the same time. Keeping the customer operation running while integrating new equipment.

Equipment Integrated

HK Systems pop-up sorter, Hytrol pick & pass conveyor, Flexible Conveyor in shipping, 3M case sealers, and Mettler Toledo in-motion scale. Unarco racking and SSI mezzanine structure.

Control System

Compass control system with Compass Order Routing System, which interfaces with an Optum WMS.

Schedule

System integration completed in a ten (10) month time period.

Industry Type

Automotive parts distribution.

Challenge

Existing pick & shipping system had to remain operational during new installation.

Industry Profile

Brick & mortar, national.
